#### "Home" Town, America

Someone has truly said that the soul of America abides in its small towns—the "home" towns which one never forgets where're he may roam.

There are many reasons for this, and one may be that in our "home" towns the people know each other—as human beings; not just names, as neighbors on the street of markly luncher clubs. street, at weekly luncheon clubs, in lodge or in church. Thus, some place along the line the factory president is going to meet his employee, the farmer will meet the elty" man—and the three of them will discover that they are not so different in what they think and hope and work for.

and work for:

The great national groups that are symbolized under the tags of Management, Labor, Agriculture are (ar should be) nothing more fearsome than the projection in aggregate of these three "home" town neighbors.

In trying days ahead, when "close harmony" will be essential to the well-being of us all, it will help if we can keep that thought in mind—and in our hearts!

TO PREVENT SKIDDING on slippery pavements, do not release your clutch until your ear has been reduced to about 8 miles per hour. At all times, if your ear should go into a skid turn your wheel in the same direction as the rear end of the car tends to go, and only to the extent of keeping ear in line. Do not jam on your brakes, for when traction is lost so is your control.
